

Department: Proctology

Doctor Name: Dr. Samhitha Reddy

Doctor Timings: 10:30 AM to 6:00 PM

Diagnosis:

Piles: Hemorrhoids, also known as piles, are swollen veins in the lowest part of the anus and rectum. They can cause significant discomfort, swelling, and bleeding during bowel movements, with symptoms including pain, itching, and noticeable lumps around the anus.

Approx Cost: 65K onwards

Fissures: Anal fissures are small tears in the mucosa that lines the anus, which can cause severe pain, particularly during and following bowel movements, and bleeding.

Approx Cost: 60K

Fistula: An anal fistula is a small tunnel that forms between the end of the bowel and the skin around the anus causing pain, discharge, and discomfort, often resulting from an infection or an abscess.

Approx Cost: 70K

Absceous: An abscess is an infected fluid and pus-filled pocket that forms in tissue as a reaction to infection. It can cause significant pain, swelling, and redness, and may require surgical intervention to drain and treat effectively.

Approx Cost: 15K under anesthesia, 60K
